Customer Journey Map

Date	29 June 2026
Team ID	XXXXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	2 Marks

Phase of Journey	Stage 1: Provide Input	Stage 2: Emotion Detection & Analysis	Stage 3: Learning Support & Improvement
Actions *(What does the customer do?)*	• Opens the application • Selects learning module • Enables webcam or uploads image/voice/text	• Waits for emotion analysis • AI detects emotional state • Emotion score and confidence are generated	• Views emotion report • Receives personalized learning recommendations • Continues learning and tracks progress
Touchpoint *(What part of the service do they interact with?)*	• Streamlit Web Interface • Camera/Upload Button • Learning Module Selection	• Emotion Detection Model (CNN/LSTM) • OpenCV/MediaPipe • NLP & Speech Analysis Engine	• Personalized Dashboard • Learning Recommendation Engine • Progress Report & Analytics
Customer Thought *(What is the customer thinking?)*	• Is my camera or microphone working? • Will the system detect my emotions correctly? • I hope this helps my learning.	• Did the AI recognize my emotion accurately? • Why am I feeling stressed or confused? • What can I do to improve?	• These recommendations are useful. • I understand my emotional patterns. • I can improve my learning experience.
Customer Feeling *(What is the customer feeling?)*	• Curious • Excited • Slightly nervous	• Interested • Hopeful • Engaged	• Confident • Motivated • Satisfied
Process Ownership *(Who is responsible?)*	Student AI System	Student + AI System	
Opportunities *(How can we improve?)*	• Better user interface • Support multiple input methods (face, voice, text) • Faster input validation	• Improve emotion detection accuracy • Reduce processing time • Support multilingual	• AI-based personalized learning plans • Emotion trend tracking • Performance analytics

	emotion recognition	• AI chatbot for continuous learning support
