Maximum Marks	4 Marks

Empathy Map

the empathy map helps understand the learner's perspective by identifying what they **say, think, do, and feel** while interacting with the **Emotion Detection and Learning Support Engine (EDLSE)**. These insights guided the development of an AI-powered solution that detects learners' emotional states and provides personalized learning support to improve engagement, motivation, and academic performance.

Empathy Map Section	User Perspective
SAYS	• "I want learning to be easier and less stressful."• "I need personalized guidance when I feel confused."• "I hope the system understands how I feel."• "I want feedback that helps me improve."
THINKS	• "Am I understanding this topic correctly?"• "Why do I lose focus while studying?"• "Will the AI detect my emotions accurately?"• "Can this system help me learn better?"
DOES	• Uploads an image, records voice, or enters text.• Uses the application regularly to monitor emotions.• Reviews personalized learning recommendations.• Tracks emotional and learning progress through the dashboard.
FEELS	**Before**: Stress, anxiety, frustration, confusion, lack of motivation.**After**: Confidence, engagement, motivation, satisfaction, and improved understanding through personalized support.
