Communication

Date	4 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	1 Mark

Communication Plan

Effective communication played an important role throughout the development of the Emotion Detection and Learning Support Engine (EDLSE). Since this project was developed individually, communication mainly involved self-planning, mentor guidance, documentation updates, GitHub version control, and issue resolution using technical resources. These communication activities ensured systematic development, timely completion, and successful deployment.

Communication Activities

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Self Project Planning	Daily	VS Code, Notepad	Project Developer	Plan daily development tasks, milestones, and implementation schedule.
2	Progress Update	Weekly	GitHub	Project Developer	Track project versions, manage source code, and monitor

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
					development progress.
3	Issue / Bug Resolution	As Needed	ChatGPT, Google, Stack Overflow	Project Developer	Resolve coding issues, optimize AI models, and improve application performance.
4	Mentor / Faculty Review	Bi-Weekly	SmartBridge Portal / College Faculty	Student, Mentor	Receive technical feedback and improve project quality.
5	Final Demonstration Preparation	Once	Streamlit Application	Project Developer	Verify all features before the final project demonstration.
6	Documentation Review	Once	VS Code, Microsoft Word/PDF	Project Developer	Review and finalize project documentation according to SmartBridge guidelines.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Integrating multiple AI models for facial, voice, and text emotion detection.	Referred to official documentation, research papers, and AI resources; performed extensive testing and model optimization.
2	Managing library dependencies and deployment configuration.	Updated package versions, verified dependencies in requirements.txt, and successfully deployed the application on Streamlit Community Cloud.
3	Improving emotion detection accuracy under different lighting and audio conditions.	Applied image preprocessing, audio filtering, and optimized model parameters through repeated testing.
4	Preparing project	Structured all reports, diagrams, and

S.No	Challenge Faced	Resolution / Action Taken
	documentation according to SmartBridge standards.	documentation using the required SmartBridge format and templates.
