Coding & Solution

Date	3 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	5 Marks

Coding & Solution

This document evaluates the quality and completeness of the implemented solution. The project demonstrates working functionality, clean coding practices, modular design, and alignment with the defined requirements.

Instructions

1. Ensure the code is well-structured and documented.
2. Implement all core functional requirements.
3. Include source code, configuration files and setup instructions.
4. Provide the GitHub repository link.

Solution Summary

Repository Link / URL https://github.com/24102A010735/Emotion-Detection-and-Learning-Support-Engine *(Replace with your actual GitHub repository if different.)*

Programming Language(s) Python, HTML5, CSS3

Framework(s) Used Streamlit

AI/ML Libraries	TensorFlow, Keras, OpenCV, MediaPipe, Scikit-learn, NLTK, TextBlob, Librosa
Key Features Implemented	User Authentication, Facial Emotion Detection, Voice Emotion Recognition, Text Sentiment Analysis, Personalized Learning Recommendations, Interactive Dashboard, Progress Tracking, PDF Report Generation
Pending / Incomplete Features	None
Setup / Run Instructions	1. Install dependencies using pip install -r requirements.txt. 2. Navigate to the project directory. 3. Run the application using streamlit run app.py. 4. Open the local Streamlit URL in your browser to access the application.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions/classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments/documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes
