Project Demonstration

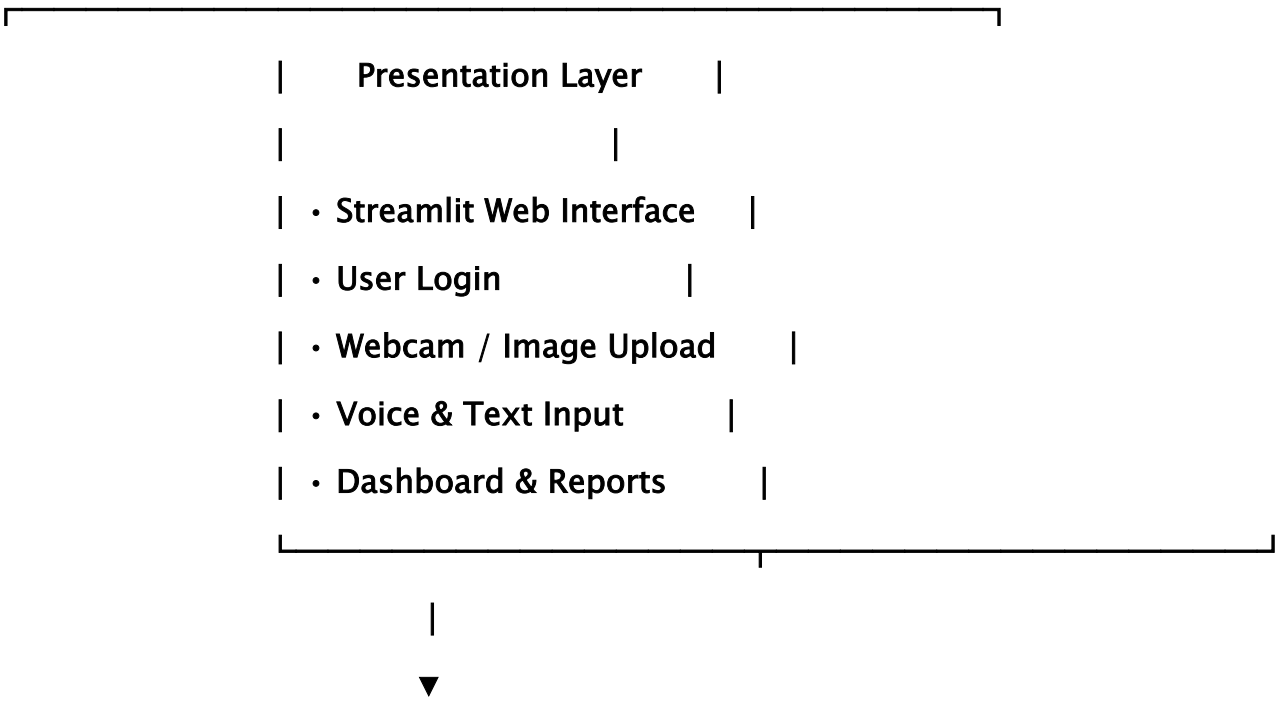

Date	4 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	5 Marks

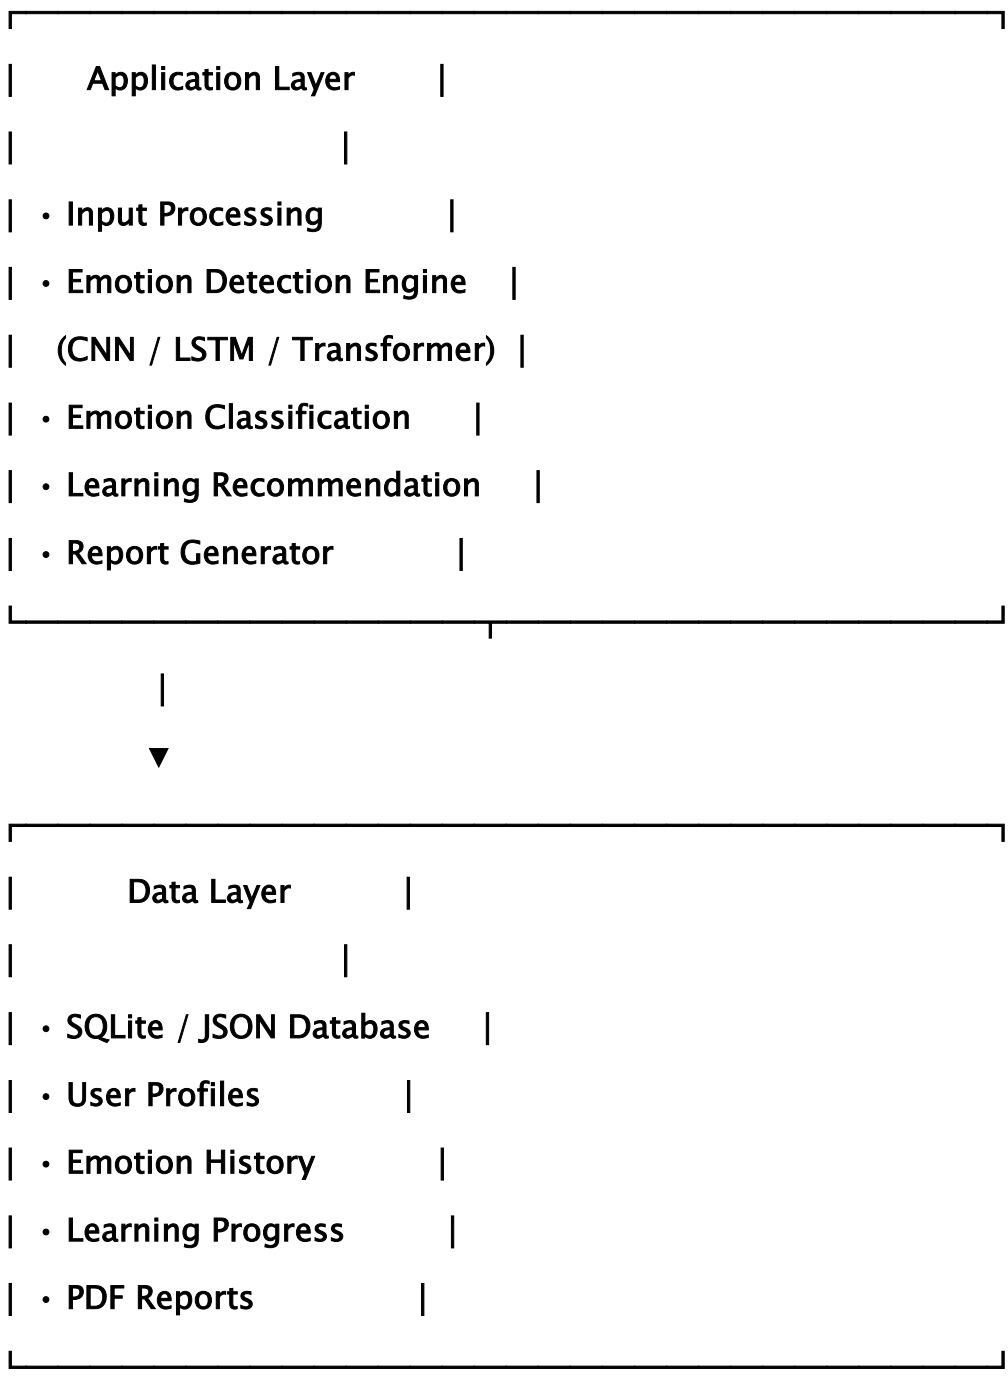

Project Demonstration Overview

This section demonstrates the complete workflow of the **Emotion Detection and Learning Support Engine (EDLSE)**. The application accepts **facial images, webcam input, voice recordings, or text**, detects the learner's emotional state using AI models, provides personalized learning recommendations, visualizes emotion analytics, and generates a comprehensive PDF report.

3. Running the Application

Figure 3: Streamlit Server Started Successfully

Steps to Run

pip install -r requirements.txt

streamlit run app.py

The Streamlit server starts successfully and generates a local URL (for example, http://localhost:8501) to access the application.

---

4. Streamlit Application Running

Figure 4: Application Running on Localhost

The application launches successfully in the web browser, displaying the login page and the main dashboard for emotion detection and personalized learning support.
