Project Executable Files

Date	4 July 2026
Team ID	XXXXXX
Project Name	**Emotion Detection and Learning Support Engine**
Maximum Marks	3 Marks

Project Executable Files

This section contains all executable and deployable files required to run the Emotion Detection and Learning Support Engine (EDLSE). All required project files, documentation, and deployment details are included for evaluation.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete Source Code (All Files & Folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt	Yes
4	Database Schema / Seed Files (SQLite/JSON)	Yes
5	.env.example / Environment File	Yes
6	Deployed Application URL	Yes
7	Executable Package (Optional)	NA
8	Dockerfile (Optional)	NA
9	Test Files & Results	Yes
10	Demo Video	Yes

Step 2: File / Folder Structure

Emotion-Detection-and-Learning-Support-Engine/

|

```
├── app.py
├── requirements.txt
├── README.md
├── .env.example
├── dataset/
│   ├── images/
│   ├── audio/
│   └── text/
├── models/
│   ├── emotion_model.h5
│   └── recommendation_model.pkl
├── utils/
│   ├── emotion_detection.py
│   ├── recommendation.py
│   ├── report_generator.py
│   └── database.py
├── reports/
├── assets/
├── static/
├── tests/
├── screenshots/
└── .gitignore
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Your Streamlit Community Cloud URL
Login Credentials	Not Required (or provide demo credentials if authentication is enabled)
Platform / Hosting Provider	Streamlit Community Cloud
Repository Link	Your GitHub Repository URL
Demo Video Link	Your YouTube / Google Drive Link

Step 4: Run Instructions

1. Clone the GitHub repository.

2. **Navigate to the project directory.**
3. **Install all required dependencies:**

```
pip install -r requirements.txt
```

4. **Start the Streamlit application:**

```
streamlit run app.py
```

5. **Open the local Streamlit URL displayed in the terminal (typically http://localhost:8501) in your web browser.**
6. **Upload a face image, provide voice/text input, or use the webcam to detect emotions and receive personalized learning recommendations.**

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Emotion detection accuracy may decrease under poor lighting or low-quality webcam images.	Use a well-lit environment and a clear camera.
2	Background noise can affect voice emotion recognition accuracy.	Use a quality microphone in a quiet environment.
3	Large image, audio, or video files may increase processing time.	Use supported file formats and moderate file sizes.
4	Internet connection is required when using the cloud-deployed application.	Run the application locally for offline usage.
5	Emotion prediction may vary depending on facial expressions and voice clarity.	Collect clear input and use multiple observations for better results.
