Performance Testing

Date	3 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	5 Marks

Step 1 : Testing Overview

Field	Details
Testing Tool Used	Manual Functional Testing (Streamlit Application)
Type of Testing	Functional Testing & Performance Observation
Target Module / API	User Login, Emotion Detection, Learning Recommendation, Dashboard, PDF Report
Test Environment	Windows 11 • Python 3.13 • Streamlit (Local)
Test Date	3 July 2026

Step 2 : Test Scenarios

S.No	Scenario	Users	Duration	Expected Outcome
1	Launch Application	1	5 sec	Home page loads successfully.
2	Login & Provide Face/Voice/Text Input	1	15 sec	Input accepted successfully.
3	Run Emotion Detection	1	20 sec	Emotion detected and confidence score generated successfully.
4	Generate Learning Recommendations	1	10 sec	Personalized learning suggestions displayed successfully.

S.No	Scenario	Users	Duration	Expected Outcome
5	View Dashboard	1	5 sec	Emotion analytics and progress dashboard displayed correctly.
6	Generate PDF Report	1	10 sec	Emotion analysis report downloaded successfully.

Step 3 : Observations

The application successfully completed all planned test scenarios without critical errors. User authentication, emotion detection, learning recommendation generation, dashboard visualization, and PDF report generation functioned as expected. The system maintained acceptable response times and delivered accurate outputs during testing.

Step 4: Performance Results

Performance Metric	Observed Result	Status
Application Startup Time	~5 seconds	✅ Pass
Emotion Detection Time	3–5 seconds	✅ Pass
Learning Recommendation Time	<2 seconds	✅ Pass
Dashboard Loading Time	~3 seconds	✅ Pass
PDF Report Generation	~10 seconds	✅ Pass
Application Stability	No crashes during testing	✅ Pass
